ABOUT US

Dear Customers, Clients and Partners!
We are the company «ECO BAG» Ukraine - the largest producer of eco bags from spunbond material.
We have the largest selection of models or varieties of handbags for all purpose in Ukraine.
Our company has 4 directions of sales:
1. Wholesale - is cooperation with network supermarkets and sales offices all over Ukraine. The assortment includes more than one hundred types of bags with ready-made pattern in one, two three and four colors of printing on the bag, automated silk screen printing equipment, which allows to produce in a short time, huge circulation of production. We also produce laminate bags that do not pass moisture and allow you to apply a full color pattern on the entire bag. Metallic bags, matte or glossy bags, as well as backpacks, covers for clothing and shoes are available. For the best wholesale customer service, we have customized all processes from production to logistics, making collaboration comfortable and easy.
2. Retail sales is a cooperation with sellers directly in cities where there are no dealers

of our products. Advantages of cooperation on direct - after payment of the order, warehouse staff will send your order the next day and with small revolutions - you can quickly update the range. Our managers will always help with the selection and ordering.
3. Sale of branded handbags with any drawing or logo. We always have a wide range of material colors available and can offer you the lowest price. Spunbond logo bag is one of the best promotional media. Service life - up to 5 years. Bags, unlike other products, are never thrown away. With a spunbond bag it is convenient to go to the store, carry documents, conveniently give corporate gifts, booklets and catalogs in bags, you can put a calendar for New Year greetings for partners or anything, limited only by your own imagination.
We have 10 sizes and 4 varieties of bags for printing. The boxing bag is rectangular. A flat bag with no bottom and side panels is the most convenient for documents. A bag that has a T-shaped bottom and a bag with a bottom fold.
Our designers will prepare a preview of your layout and prepare the layout for printing.

All you have to do is order.
4. Sale of bags without drawing - for the owners of silk screen printing and advertising agencies that have their own printing parks. You can purchase a ready-made bag, either as a form or as a print base. This will help you to expand the range of products and earn additional money, as the eco bag is a commodity whose demand is growing rapidly in the Ukrainian market. You can also buy paint along with the bags for drawing. Paint is tested for spunbond printing and is much cheaper than plastisol or other silk screen printing inks. Resistant and easy to use, it does not clog the sieve.

BRIEFLY ABOUT PRODUCTION AND MATERIAL

All our production is automated.

The material is in rolls, passes the stage of cutting and printing on the stencil, and then goes to the machines running, folding and soldering seams. On the way out we have a ready-made shape without a handle. The handle is fixed by a workshop employee, also by an ultrasonic method, on a semi-automatic machine. Then our shoemakers sew the zipper into the bag and it is ready for sale. Automation allows you to achieve high speed and low percentage of defects. Our operators care about quality.

Spunbond material - or its other name is flizelin, is a non-woven material that is eco-friendly, widely used in the agricultural sector, cosmetology and medicine, as well as the production of spunbond bags.

Our production is modern, high-tech, and its employees are dedicated and responsible. In the complex you get a quality product and a high level of service.

All prices are valid within one day of invoicing. If you delay the payment, the manager can make the conversion due to changes in the rate.
